

On **22 October 2025** the General Pharmaceutical Council's Investigating Committee considered an allegation in relation to **Mr Priyesh Dilip Mistry, registration number: 2082075** and determined to issue the registrant concerned with a warning in relation to the conduct alleged.

The Committee concluded that the appropriate outcome in this case is a warning with the wording of:

This case concerns Priyesh Dilip Mistry who, at the relevant times, was a locum pharmacist working in retail pharmacies in Bristol.

On 27 July 2024, he failed to return a patient's prescription to the NHS spine when asked to do so, did not adequately check medication he dispensed and dispensed an incorrect volume of medication. He failed to communicate with the same patient in a professional manner.

On 8 June 2024, in another setting he was heard to make unprofessional statements indicating both political views and using violent terms.

During the investigation of these matters it came to light that Mr Mistry had treated colleagues in an inappropriate and unprofessional manner. This included him behaving in such a manner that one colleague 'dreaded going to work' and felt demeaned by him. Some comments made references to hugging, touching or sexual behaviour which were entirely inappropriate in the workplace

The above matters are serious, had the potential to cause patient harm and to undermine the trust of both the public and colleagues in the profession. They are also in breach of the following GPhC Standards:

Standard 1 requires pharmacy professionals to deliver person-centred care, including giving the person all relevant information and making use of the best resources available

Standard 2 requires pharmacy professionals to work in partnership with others

Standard 3 requires pharmacy professionals to communicate effectively

Standard 6 requires pharmacy professionals to behave in a professional manner

Standard 9 requires pharmacy professionals to demonstrate leadership

The purpose of the warning is to remind Mr Mistry of the need to abide by all GPhC standards and, in particular, the importance of him treating both those with whom he works and patients with respect and having regard to how others may perceive his actions and what he says.

Any repetition of these, or similar, failings is likely to result in further regulatory intervention.

This warning will be published on the register and will be available for 12 months.
