

On **19 November 2025** the General Pharmaceutical Council's Investigating Committee considered an allegation in relation to **Mrs Bindy ROWCROFT, registration number: 2065942** and determined to issue the registrant concerned with a warning in relation to the conduct alleged.

The Committee concluded that the appropriate outcome in this case is a warning with the wording of:

Bindy Rowcroft ("the Registrant") is a pharmacist who worked for The Medical Group between 2023 and 27 November 2024.

Whilst at work, on an unknown date between June and November 2024, the Registrant gave an injection of homeopathic vitamin B12 to Colleague A. In return she received the same injection from Colleague A. The Registrant was unsure as to the injected substance's nature or provenance, it having been sourced from the internet. Prior to administering the injections no appropriate checks were made regarding medical history, including potential allergies or contraindications. No records of the injections were made. Neither the Registrant or Colleague A were a registered patient at the practice.

Her actions breached the following standards for pharmacy professionals:

Standard 2. Working in partnership

Standard 3. Effective communication

Standard 5. Professional judgement

Standard 6. Professional behaviour

Standard 8. Speaking up about concerns

Standard 9. Leadership

Acknowledging the reflection and insight the Registrant has shown, the Registrant is warned that she should only ever administer medication when she has fully satisfied herself that it is necessary, appropriate and safe to do so. She should also ensure she is aware of the nature and provenance of any such medication administered.

This warning will remain on the public register for 12 months.
