

On **21 May 2026** the General Pharmaceutical Council's Investigating Committee considered an allegation in relation to **Mr Alexander Pascoe, registration number: 5114366** and determined to issue the registrant concerned with a warning in relation to the conduct alleged.

The Committee concluded that the appropriate outcome in this case is a warning with the wording of:

This matter relates to the pharmacy professional, prior to his registration with GPhC, obtaining employment as a Pharmacist Technician by falsely stating that he had completed his pharmacy technician qualification and informing his employers that he was due to register with GPhC as a Pharmacy Technician in September 2024. He repeatedly told managers that the delays to his registration were administrative in nature, when in fact his qualification had not been completed and was not complete until January 2025.

This behaviour constitutes a serious breach of trust and integrity and is contrary to the professional standards expected of Pharmacy Technicians on the register. Such conduct undermines the confidence of members of the public in the integrity of the profession.

Mr Pascoe is warned that honesty, integrity and transparency are fundamental aspects of being a pharmacy professional and that he is required to take responsibility for his registration status and accurately reflect this at all times to his employers. Any further instance of dishonesty, lack of candour or false representations may result in more serious regulatory action.

This warning will be published on the register and will be available for 12 months.
