Facts proved by admission:	1, 2, 3, 4, 5 and 6.
Fitness to practise:	Impaired
Outcome:	Warning

Warning:

The Committee has found, by your own admissions, that your actions amounted to a serious failure to meet the Standards for pharmacy professionals, in particular it has found that you breached Standards 2, 5, 6, 7 and 9. You acted with a lack of integrity in placing your own commercial interests above patients' interests, you breached patient confidentiality and you removed/amended/created patient PMRs on 12 occasions which incorrectly suggested the patients concerned had received their medication from a particular pharmacy when this was not accurate.

Your conduct was unacceptable and fell below the standards expected from a registered pharmacy professional. Your actions brought the profession of pharmacy into disrepute and breached some of the fundamental principles of the pharmacy profession.

You have remediated your misconduct and do not pose an ongoing risk to the public. You have been found to be impaired in the wider public interest of marking the seriousness of your conduct, declaring and upholding proper standards of behaviour and maintaining public confidence in the profession.

The Committee having heard your evidence and considered your documents and representations is of the view that a Warning is required to stand as a reminder to you and to other pharmacy professionals of the importance of meeting the Standards required of pharmacy professionals at all times. Failing to do so may negatively affect the reputation of pharmacy professionals and must not be repeated.

In particular, you must ensure that you prioritise patients' interests at all times. You must consider carefully the risks and consequences of any actions you take relating to prescriptions, patient data, confidentiality and consent so that you meet the standards expected of pharmacy professionals to ensure the safe and effective provision of pharmacy services.

This Warning will be published on the register against your name and will be available for 12 months. If you do not comply with this warning, it may be taken into consideration by an Investigating or Fitness to Practise Committee in the future.
